

Hip Instructional Course

Direct Anterior Approach

01 May 2015

Australian School of Advanced Medicine, Sydney

Chairperson: Mr Michael Pritchard, Hobart, Tasmania

Course Disclaimer & Code of Practice

Smith & Nephew Surgical Pty Ltd (Smith & Nephew) is committed to following the Medical Technology Association of Australia (MTAA) Code of Practice and as such, this course and related hospitality functions are intended solely for the invited Healthcare Professionals. Employees of public institutions are required to notify their employer of their attendance at this course.

The information in this program is correct at the time of publication, however the course chairperson and/or Smith & Nephew reserves the right to amend the program, speakers and logistical information without notice, or as a result of circumstances beyond its control.

Mr Michael Pritchard
Chairperson
Hobart, Tasmania

A/Prof Patrick Weinrauch
Faculty
Brisbane, Queensland

Course Description

The course will cover a comprehensive review of the Direct Anterior Approach (DAA) including pre-operative planning, intra-operative tips and tricks, instrumentation and current evidence. It will provide attendees with an opportunity to gain hands-on experience of both the traction-free and on-table traction approaches.

Attendees are encouraged to ask questions and interact with the faculty during the lab sessions and following the course.

Learning Objectives

By attending this course, participants will be able to:

- Identify the anatomical considerations relevant to the DAA in hip arthroplasty
- Cite evidence for the DAA in hip arthroplasty from published literature
- Understand the learning curve and learn how to avoid complications
- Justify the difference in patient outcomes between the posterior approach and DAA
- Practice both the traction-free and on-table traction approaches

Participant Profile

This course is open to orthopaedic surgeons with a minimum of 4 years experience in hip arthroplasty with an interest in learning the DAA and implementing the procedure into their practice during 2015.

Accreditation

This course is accredited by the Australian Orthopaedic Association (AOA) for 7 CPD points.

Course Evaluation

Please complete the course evaluation by responding to the email you receive during the course. The purpose of the course evaluation is to assess the delivery of the learning objectives and to gauge your overall satisfaction of the course. Information collected in the evaluation will provide important feedback to the chairperson, faculty and Smith & Nephew staff and may be used to identify future medical education activities.

Smith & Nephew introduces **Education and Evidence**, a powerful e-learning platform for surgeons to access and share peer-to-peer educational resources.

Providing information on joint repair and replacement, extremities, and trauma specialties, the member-based service already hosts more than 1,000 videos, articles, surgical techniques, tablet apps and iBooks.

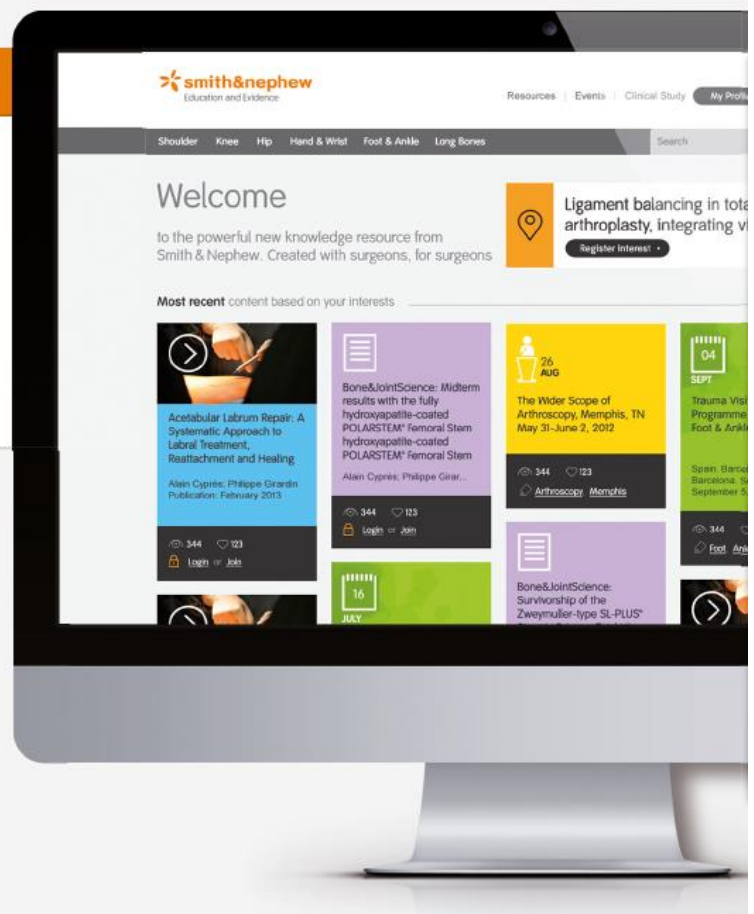

Education and Evidence provides powerful search facilities and the ability to customise content, whilst also enabling the sharing of resources with colleagues. It is optimised to work on computers, tablets and smartphones, offering both iPad and Android apps.
