Program Description

The course is designed to provide all aspects of the tableless direct anterior approach and train the related surgical approach in hip joint replacement using Tissue Sparing Solutions (TSS) instruments. The interactive presentations, case discussions, and cadaveric hands-on workshop will be lead by highly experienced international and regional key opinion leaders. The contents will be patient selection, pre-operative planning, surgical tips & tricks, surgical outcomes, and more.

Participants Selection Criteria

Orthopaedic surgeons with more than 3-5 years of clinical experiences in hip joint replacement who are familiar with conservative surgical approaches such as postero-lateral, and direct lateral and who want to learn the direct anterior approach without using special surgical table.
